Breer Makes A Difference

Servers 100% Online

After facing a bad service from their previous web vendors, Vivekanand Education Society asked us to manage their servers as their websites were blacklisted for malware within 3 months of launch. We not only cleaned the website code but have kept their websites up and running for the last 9 months without any issues as of now.

Fast Prototype Launch

A concept was created overnight and the need of the hour was to build a prototype. The Breer team worked on the UI/UX designs, got approvals and created not one but three design iterations, No Code App development and REST API integration within 2 months. The app is not in phase 2 for further feature development.

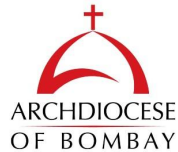

Retainership Renewal

Bad experiences from the past has led Vira International to lose faith in digital marketing agencies. We got a surprise call to come for a meeting and proposed a 3 month digital marketing retainer test. We are currently working with them for 9 months with constant upgrades and modifications to campaigns to help them brand themselves better constantly.

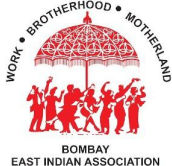

Breer Thrives On Clients Trust

And The List Goes On & On

Thanks!
